

Social Security in Small Jurisdictions – Size Does Matter?

EISS Conference 2022

22-23 September 2022

Aula Zeger Van Hee

Tiensestraat 41, Leuven

Belgium

Introduction

Small states have been ignored in the literature of the welfare regime, though it is likely that they are confronted with specific issues or problems when dealing with social security. Of course, small jurisdictions are very diverse: they can be rich or poor, reflect different legal traditions, and may have many other differences. We will focus on questions that can bring them together, which are explicitly linked to the small nature of the jurisdictions, such as scale disadvantages, limited human resources and infrastructure, the importance of immigration and/or emigration and the difficulties to conclude balanced social security coordination agreements with major emigration and/or immigration countries Can we identify problems unique to social security in small jurisdictions as well as ways of dealing with these problems?

With this conference we have the ambition to highlight the challenges small jurisdictions face in their social security systems.

Draft Programme

DAY 1 – 22 September 2022

9.30-10.00 *Opening*

President of the EISS
Dean Law Faculty
